SOUTHERN GERMANY ATTACKED THURSDAY BY U. S. BOMBERS

BLOW WAS QUICK FOL-LOWUP OF RAF BLAST-ING DURING NIGHT

By GLADWIN HILL
LONDON, March 16.—(P)—
Rearing down on Southern Germany in great strength, U. S. heavy bombers struck another hard blow today in quick sequence to a record night attack by the RAF which hit Stuttgard, Munich and other targets with more than 1,000 four-engined bombers carrying over 3,360 tons of bombs. It was the U. S. Strategic Air Force's second aerial invasion of Germany in as many days.

Force's second aerial invasion of Germany in as many days.

First detailed accounts of the smash came from the German radio which said widespread falls of snow and close clouds caused great difficulties in getting fighters off the ground to meet the onslaught.

onslaught.

Nevertheless, the German reports said, fierce air battles took place along the bombers' course over Eastern France and Western German provinces.

Similar radio accounts yesterday, however, dwindled off into emphasis on the cloudy weather and it developed that only a small defensive force was able to meet the challenge when the Americans bombed the aircraft production

TWO DOZEN HIGH POWERED RIFLE **BULLETS FOUND**

J. M. Griffin and Robert Quinn, living on South Seventeen and One-half street, in the vicinity of the William B. Travis school, are a little puzzled by a recent find they made in an alley near their homes. While digging in the alley they encountered a cache of two dizen high-powered rifle cartridges, apparently of the 30-30 calibre, and they are wondering why, when and how they came to be there.

Make Your Cotton Acreage Pay Off—

State Registered Bryant Cottonseed-Two Varities Among the Highest Yielding Strains At All Texas, Oklahoma and Arkansas Experiment Stations

NEW BRYANT ROWDEN COTTON

The newest member of the Bryant Cotton family is a superior Rowden strain. It has many good qualities not possessed by other varieties. It is EXTREMELY EARLY and VERY FAST FRUITING - - A HEAVY LINT YIELDER even under insect conditions.

The foliage is light and open but is so placed on the plant that it is highly storm resistant. It has. large bolls mostly 5-lock that are very easily picked, yet the holl walls twist just enough to hold the cotton in the burr.

Bryant Rowden Cotton makes 38 percent lint which is an unusually high lint percent for Rowden type cotton. A good hard coarse typical Rowden staple-inch and better. Upright type plant-Drouth Resistant-Storm Resistant-Wilt Resistant. One of the highest yielding Rowden Strains ever produced.

BRYANT NO-4A COTTON

BRYANT, MEBANE COTTON-long "A FA-VORITE" and consistently one of the Highest Yielding Mebane Strains. Now-for the first time A BRAND NEW better strain has been developed. ERYANT Mebane No. 4A is really sensational. It is earlier and a much faster fruiting plant-more vigorous, higher acre vields and with the same high lint turnout and big stormproof five-lock bolls.

If you have liked BRYANT Mebane Cotton in the past you will wonder why after you see what the new BRYANT Mebane No. 4A Cotton can do.

This new strain of BRYANT Mebane No. 4-A discards all the "old ideas" that cotton can have only a few desirable characters at one time. For instance it has been thought that to get high yields the large bolls had to give over to smaller ones that is not true, for BRYANT Mebane No. 4A has everything. Its steady growth and continuous fruiting over the entire season make the heavy yields of quality cotton which in turn roll into Dollars and Cents.

Adaptable to blackland, sand land, upland or bottomland one or both of these varities will meet your needs.

A limited supply of seed, not yet reserved, is available. The price \$2.65 per bushel in Corsicana or Roanc. \$2.75 per bushel with freight prepaid to Texas points.

"I've even been approached with a question as to whether I would run for vice president with Roosevelt but I turned 'em down."

O'Daniel was asked who had approached him but he declined to say.

He said "there is little question about who will be the democratic presidential nominee' and the "only question about the vice presidential nominee is one of selecting a candidatee who will make a strong running mate for Roosevelt."

He added: "They'll wait till the last minute and then pick a man they think can pull the most votes for the President."

He asserted that the soldier vote bill passed this week by both houses "was so loaded down with amendments that now it's about as imptonent as a de-horned steer. It won't mean a thing in Texas."

CROSSES OF SOLDIER DEAD LINK WITH CHRIST'S CROSS*

Forests of Crosses on Battlefield Point to Re- CAMPS IN GERMANY demption Sacrifice of Warriors for New Jersey City, N. J., March 16.—
World—The Symbol of Love and Life—The exchange liner Gripsholm in a slow trickle today, and with them came accounts of nazi inquisitions, of dreadful food and of German mortage holstered only by frightened Midland. They were joined Sun-

By WILIAM T. ELLIS.

War pictures sometimes show great expanses of crosses, man's fared expanses of crosses, man's fared expanses of crosses, man's fared expanses of the solder dead. They appear near every battle, the government has perceived the appropriateness of the cross symbol of these men who sacrificed their lives in redemptive service of the world. Their death is the price paid for man's past simning and for the worlds new life. Thus they are linked with that greatest Life, which made the cross for ever the symbol of love and hops and salvation.

On the church altars and steeples; on women's necklaces; pendant on men's watch charms; on wayside shrines; in graveyards everywhere, the cross is shown as man's favorite symbol. It evokes something from the deeps of the human spirit. For it is a reminder of the supreme fact of eternity, the death of a sinless Saviour by whom man is redeemed. We are institutely awed in several contents of the cross saver which start and ware contents of the price and for the suprementation of the suprementa

Col. Kearby's record of 21 planes had placed him in a tie for top fighter honors in the Southwest Pacific with Capt. Richard I. Bong, Poplar. Wis.

(Higher records have been set by such fighter pliots as Marine Major Joe Foss in the South Pacific.)

Kearby had been decorated 11 times. In addition to the Congressional Medal of Honor, he wore the Air Medal and four Oak Leaf Clusters and three Oak Leaf Clusters and the Silver Star.

He came to the Southwest Pacific June 15, 1943, as commanding officer of a P-47 unit. Kearby first broke into the headlines Oct. 11, 1943, when over Wewak he shot down six enemy planes in one whirling dog fight. A seventh plane he engaged was so good a "probable" that many wanted him to claim it although Kearby himself refused because pictures taken by his nose cameraman didn't catch the plane being destroyed.

Nobody fully understands Calvary. The Theme is not one to be lightly protited, or mechanically prattled. Awe befits us as we stand bowed before the avowed eternal purpose of God. Synthetic Rubber Outwits Japan !

TWO years ago the Japanese overran the East Indies and the United States lost its rubber supply. But synthetic rubber stepped into the breach and in some cases has proved itself even better than the natural rubber. Here are some ways in which it has kept the American war machine rolling.

bies is more prevalent in winter than in the so-called dog doys of summet.

In a statement released this week by Dr. Geo. W. Cox, State Health Officer, it was disclosed that in February the State Laboratory examined 316 animal brains for the presence of rabies, over thirty-seven per cent of which tested positive.

"If all stray dogs were destroyed, and all pets vaccinated for rabies, it would go far toward stamping out this justly feared fatal disease." Dr. Cox said.

The doctor stressed that all dogs suspected of rabies be confined ten days for observation to see if the disease develops. If a dog sickens and dies during the Dank on the Brain, or killing the dog prematurely, or in such a manner as to injure the brain may make correct laboratory findings uncetain, if not impossible.

Dr. Cox declared that after a dog is contined ten days and then killed, there is still ample time for a victim of his bite to be treatd for rables prevention, but he cautioned that if the disease is found to be present in the dog, the victim should begin treatment of the cautioned that if the disease is found to be present in the dog, the victim should begin treatment of the cautioned that if the disease is found to be present in the dog, the victim should begin treatment of the states that all the dog, the victim should begin treatment of the cautioned that if the disease is found to be present in the dog, the victim should begin treatment of the cautioned that if the disease is found to be present in the dog, the victim should begin treatment of the cautioned that if the disease is found to be present in the found to the present in the dog, the victim should begin treatment of the cautioned that if the disease is found to be present in the dog, the victim should begin treatment of the cautioned that if the disease is found to be present in the cautioned that if the disease is found to be present in the cautioned that if the disease is found to be present in the cautioned that if the disease is found to be present in the cautioned
